## İş Sistemine İlişkin Temel Kavramlar

Genel bir sistem tanımlı yapacak olursak, aynı amaca yönelik ilişkilerde bulunan öğelerin oluşturduğu bütüne **sistem** denir. Sistemler üç türüdür<sup>1</sup>:

a) Teknik (makine ) sistemler

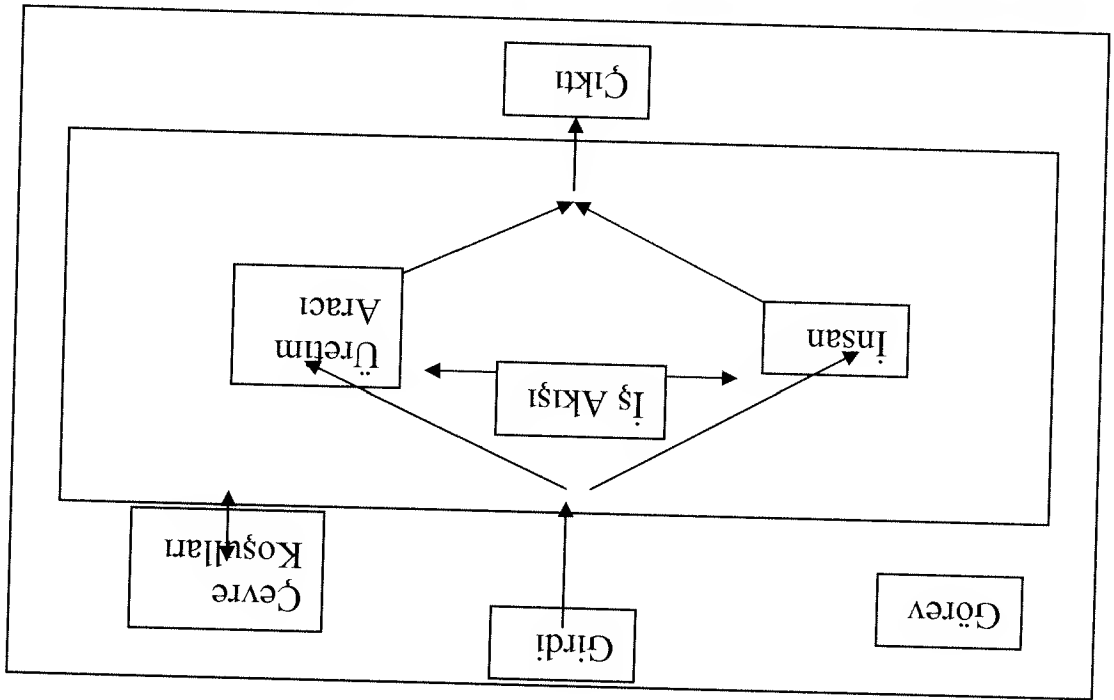

b) Sosyal (insan ) sistemler

c) Sosyo teknik (insan-makine) sistemler

Teknik sisteme örnek olarak otomatik aktarmalı makineler, sosyal sistemlere örnek olarak işletme toplantısı, sosyo-teknik sistemlere örnek olarak iş akış bantı gösterilebilir.

İş sisteminin ise yedi elemanı vardır. Bunlar<sup>2</sup>:

### Şekil.1. İş Sistemi

**-Görev:** Sistemin amacını ve sistemin niye varolduğunu belirtir.

**-İş akışı:** İş akışı, insan, makine ve girdinin bir görevi yerine getirirken karşılıklı etkileşimleri sonucunda ortaya çıkan süreçtir.

**-Girdi:** Girdiler iş sistemi içinde görevi göre hal, biçim ve durum değişikliğine uğrarlar. Bazen bilgi de bir girdi olabilir. Burada önemli nokta girdinin değişime uğramasıdır. Bir başka önemli konu ise, bazı girdilerin kimi iş sistemleri için çıktı olabileceğinin göz önünde bulundurulması gereğidir.

**-İnsan ve Üretim Aracı:** Girdileri çıkırlara çeviren elemanlardır.
